Subject: Dissertation project

Hello

I wonder if you would be able to help with the following:

A final year BSc Computing and Systems Development student is wanting to carry out some research for his Dissertation project.

He is asking the college for 2 things.

- A report of student internet activity during a taught session/sessions. (Anonymised) – I suspect this would need to come from IT
- For the above group a RAG rating of each student's progress, over the course of years. (Anonymised) - This would need to come from the class tutor.

Although all this information would be anonymised, would we be able to provide this student with such information.

████ – My question to you would be, would it be possible to produce such a report for a give class/ classes.

Decision
